ELSEVIER

Microporous and Mesoporous Materials 20 (1998) 409–410

MICROPOROUS AND MESOPOROUS MATERIALS

Contents

Editorial 1
Facile synthesis of synthetic todorokite (OMS-1), co-precipitation reactions in the presence of a microwave field
E. Vileno, Y. Ma, H. Zhou and S.L. Suib 3
Materials derived from synthetic organo-clay complexes as novel hydrodesulfurization catalyst supports
K.A. Carrado, C.L. Marshall, J.R. Brenner and K. Song 17
Structural investigation of zinc oxide clustering in zeolite A and sodalite
L. Khouchaf, M.-H. Tuilier, M. Wark, M. Soulard and H. Kessler 27
Rapid synthesis of $AlPO_4$-11 and cloverite by microwave-hydrothermal processing
M. Park and S. Komarneni 39
Oxyfluorinated open framework compounds. XVIII. Dehydration of single crystals of the iron phosphate ULM-12 or $[Fe_4(PO_4)_4F_3(H_2O)_3, N_2C_6H_{14}]$ with an open structure, structural determination and magnetic study of the dehydrated phase (ULM-19)
M. Cavellec, J.M. Grenèche and G. Férey 45
Surfactant-templated silica aerogels
M.T. Anderson, P.S. Sawyer and T. Rieker 53
Photoluminescent properties of MCM-41 molecular sieves
M.E. Gimon-Kinsel, K. Groothuis and K.J. Balkus, Jr. 67
Synthesis and characterization of a porous zirconium arsenate, $[Zr_3(AsO_4)_4(H_2O)_2]\cdot 2H_2O$
D.M. Poojary, A.I. Bortun, L.N. Bortun, C. Trobajo, J.R. García and A. Clearfield 77
Hydrothermal synthesis and characterization of indium containing beta zeolite
M. Chatterjee, D. Bhattcharya, H. Hayashi, T. Ebina, Y. Onodera, T. Nagase, S. Sivasanker and T. Iwasaki ... 87
Electron spin resonance and optical spectroscopy of tubular aluminophosphate materials containing framework vanadium
Z. Luan, D. Zhao and L. Kevan 93
A functionalized porous clay heterostructure for heavy metal ion (Hg^{2+}) trapping
L. Mercier and T.J. Pinnavaia 101
Influence of high-energy ball milling on the physico-chemical and catalytic properties of titanium silicate TS-1
D. Trong On, M.P. Kapoor, E. Thibault, J.E. Gallot, G. Lemay and S. Kaliaguine 107
Cation exchange reactions of a sedimentary chabazite
E. Torracca, P. Galli, M. Pansini and C. Colella 119
Sorption of water in aluminophosphate molecular sieve $AlPO_4$-5
B.L. Newalkar, R.V. Jasra, V. Kamath and S.G.T. Bhat 129
Isomorphous substitution of Fe^{3+} in the framework of aluminosilicate mordenite by hydrothermal synthesis
P. Wu, T. Komatsu and T. Yashima 139
Crystal growth of zincophosphates from conventional media and reverse micelles: mechanistic implications
M.J. Castagnola and P.K. Dutta 149
Physical chemistry of aluminosilicate gels. Part 2. Influence of the batch molar ratio SiO_2/Al_2O_3 on chemical composition of the gels
I. Krznarić, T. Antonić and B. Subotić 161
Effect of Si to Al substitution at next-nearest-neighbor sites on the acid strength. 2. Low Si/Al ratio or high ammonia loading
K. Teraishi 177

Ammonia interaction and reaction with Al-pillared montmorillonite: an IR study
S. Bodoardo, R. Chiappetta, B. Onida, F. Figueras and E. Garrone 187
Oxyfluorinated compounds with an open framework *XX*. Synthesis and structural characterization of aza-crown ether templated $Ga_5F_2(HPO_4)_2(PO_4)_4$, $C_{12}H_{27}N_6$ (MIL-1)
F. Serpaggi, T. Loiseau, F. Taulelle and G. Férey 197
The incorporation of iron ions in $AlPO_4$-5 molecular sieves after microwave synthesis studied by EPR and Mössbauer spectroscopy
A. Brückner, U. Lohse and H. Mehner 207
The effect of hydrogen on the modification of catalytic sites in CoAPO-5 and CoAPSO-5 molecular sieves
T. Tsoncheva, R. Dimitrova and Ya. Neinska 217

Patents Report 223

Newsbrief 235

Guide for Authors 243

Influence of the SiO_2/Al_2O_3 ratio on the synthesis and physicochemical characteristics of levyne-type zeolite
C.V. Tuoto, A. Regina, J.B. Nagy and A. Nastro 247
A refined model for the active site within the NO decomposition catalyst, Cu-ZSM-5
D.C. Sayle, C. Richard, A. Catlow, M.-A. Perrin and P. Nortier 259
Thermal and cation influence on IR vibrations of modified natural clinoptilolite
G. Rodríguez-Fuentes, A.R. Ruiz-Salvador, M. Mir, O. Picazo, G. Quintana and M. Delgado 269
Acid properties of mazzite zeolites studied by IR spectroscopy
M. Guisnet, P. Ayrault and J. Datka 283
Characterization of Al_2O_3–ZrO_2 mixed oxide catalytic supports prepared by the sol–gel method
T. Klimova, M.L. Rojas, P. Castillo, R. Cuevas and J. Ramírez 293
Acidity of dealuminated β-zeolites via coupled NH_3-stepwise temperature programmed desorption (STPD) and FT-IR spectroscopy
G.M. Robb, W. Zhang and P.G. Smirniotis 307
Hydroxy-Al pillaring of concentrated suspensions of smectite clays
L. Storaro, M. Lenarda, M. Perissinotto, V. Lucchini and R. Ganzerla 317
Strengthened porous alumina membrane tube prepared by means of internal anodic oxidation
N. Itoh, N. Tomura, T. Tsuji and M. Hongo 333
Synthesis of metatungstate pillared layered double hydroxides with variable layer composition. Effect of the Mg:Al ratio on the microporous structure
M.R. Weir and R.A. Kydd 339
Crystallization of microporous aluminophosphates and Me^{2+}-substituted aluminophosphates investigated by in situ synchrotron X-ray powder diffraction
A.N. Christensen, P. Norby and J.C. Hanson 349
In situ ESR study of RhHZSM-5 interaction with different compounds
A.V. Kucherov, S.G. Lakeev and M. Shelef 355
Modification of ZSM-5 zeolite with trimethyl phosphite. Part 1. structure and acidity
P. Tynjälä and T.T. Pakkanen 363
Template control of framework topology and charge in new phosphate- and arsenate-based sodalite analogs
X. Bu, T.E. Gier, P. Feng and G.D. Stucky 371
